## SELMA

## SCREEN TIME THAT GIVES YOU EXTRA FOCUS

*The Silento Screen™ range is our practical and neat screen solution, which makes it simple to create sound dampening “rooms within the room”. Section off the room with our floor screens, or make your desk more private with a table screen. With our smart connection fittings, you can easily combine different-sized screens in order to create a meeting room or transform a large area into several individual offices.*

### SMART CONNECTIONS

With our smart connections and stable feet, you can customize the screens exactly as you want.

### EFFECTIVE SOUND ABSORBER

Selma has a 44 kg/m<sup>3</sup> fibre filling, which gives it both very good sound absorption properties and super stability.

### EASY TO MOVE

You can put wheels on Selma floor screens to easily move the screens in the room.

### FUNCTION LIST AS AN OPTION

Complete your table screen with a function list and choose from several accessories to free up table space. The function list is factory-assembled.

# SILENTO | SCREEN

## SELMA TABLE SCREENS

Selma is an exclusive and modern table screen that comes in seven different widths - and four different fabrics - as standard. Selma has a 44 kg/m<sup>3</sup> fibre filling, which gives it both very good sound absorption properties and super stability. The fibre material used is made of waste material from production, along with recycled PET bottles.

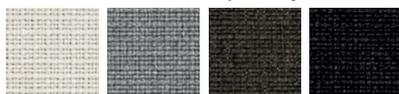

Selma is also available in a reinforced model, which means that the screen is supplied with a factory-fitted track system, so that you can install heavy equipment, such as a display screen, directly onto the screen.

TABLE SCREEN	W (mm)	H (mm)	D (mm)	ART.NO (standard)	ART.NO (reinforced)
SELMA 80	800	650	40	6758065-XXX	6778065-XXX
SELMA 100	1000	650	40	6751065-XXX	6771065-XXX
SELMA 120	1200	650	40	6751265-XXX	6771265-XXX

## SELMA FLOOR SCREENS

With Selma floor screens, you have multiple possibilities to construct a secluded space as needed, regardless of how your office looks. With our smart connection fittings and stable feet, you can adapt the partitioning exactly as you want. You can even fit castors to move it smoothly around the room. Selma floor screens come in seven different widths and four different fabrics as standard (other fabrics are available as non-stock items).

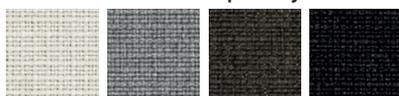

Selma has a 44 kg/m<sup>3</sup> fibre filling, which gives it both very good sound absorption properties and super stability. The fibre material used is made of waste material from production, along with recycled PET bottles.

### SOUND ABSORPTION

Silento Screen products are laboratory-tested for sound absorption ( $N_{10}$ -value). This means, among other things, that the products have been tested for the most common frequency ranges in office environments.

### SUSTAINABILITY AND ENVIRONMENT

The material used for Silento Screen products is certified according to Standard 100 by OEKO-TEX®. This means that the products meet strict human ecological requirements, i.e. do not contain chemicals in concentrations that are harmful. The products are also largely made from recycled material; partly waste material from production, and partly recycled PET bottles.

### RE: SCREEN - WE RECYCLE YOUR PARTITIONING

Our partitioning is recyclable over and over again. When you are ready to change your Silento Screens, you can deposit them with us to give them new life. We renovate, reuse, and recycle the material in order to produce new partitioning, either for your own or someone else's office. Contact us to learn more.
