# SILENTO | WALL

## SOFT

*Soft is a fabric-clad sound absorber with straight cut edges. The grey core fill is visible from the side. Mix sizes and colours to create your own design and a nicer feel to the room.*

### MIX & MATCH

Build your own work of art that at the same time dampens the sound level and reduces the echo.

Soft with its grey core is available in three different fabric colours as standard: rust, black-grey, and dark blue. Own fabric choice against quote.

### EASILY ATTACHED

Soft is easily attached with a Velcro strip that is screwed to the wall.

### LOWERS THE NOISE LEVEL IN THE OFFICE

The products in the Silento Wall™ series are sound-tested in 200 m<sup>2</sup> environments, and achieve substantial noise suppression in the most common frequency ranges for office environments.

### SUSTAINABILITY AND ENVIRONMENT

The basic material of all absorbers in Silento Wall™ is comprised of 100% recycled PET. The fabric is called Gabriel Hush, and is certified in accordance with Standard 100 by OEKO-TEX®.

Both the fabric and the basic material are tested and approved in relation to Euroclass fire ratings (B-s1, d0).

#### MEASUREMENT

Diameter	500/750 mm
Depth	50 mm
